DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "filter" must be shown or the feature(s) canceled from the claim 14. No new matter should be entered. Furthermore, the drawings are objected to because Step 108 "Deac Trq + δ " should read "Deac Trq – δ ".

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 10, 11 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by McKay et al (US 6,619,258).

See Fig. 3A and Step 158, for the controller receiving position information from accelerator pedal position sensor 40 and changing the displacement of variable displacement gasoline internal combustion engine in response to accelerator pedal position sensor 40 and inherently available torque provided by the variable displacement gasoline internal combustion engine in a partially displaced operating mode.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over McKay et al (US 6,619,258) in view of Ament (US 6,687,602). Ament discloses an eight-

cylinder engine; manifold pressure is representative of torque and a filter. It would have been obvious to a person having ordinary skill in the art to modify McKay et al by employing an eight-cylinder engine; manifold pressure is representative of torque and a filter in order to provide eight-cylinder engine with a filter, wherein the manifold pressure is representative of torque for variable displacement internal combustion engine.

Allowable Subject Matter

Claims 1-9 and 16 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference by Matthews et al (US 6,615,804) discloses method and apparatus for deactivating and reactivating cylinders for an engine with displacement on demand.
